American Journal of Physiology:
Heart and Circulatory Physiology

No. 1. JULY 1996

CARDIAC PHYSIOLOGY

Comparative effects of contraction and angiotensin II on growth of adult feline cardiocytes in primary culture
H. Wada, M. R. Zile, C. T. Ivester, G. Cooper IV, and P. J. McDermott H29

SERCA2a and mitochondrial cytochrome oxidase expression are increased in hearts of exercise-trained old rats
C. A. Tate, T. Helgason, M. F. Hyek, R. P. McBride, M. Chen, M. A. Richardson, and G. E. Taffet H68

Economy of contraction of cardiomyocytes as influenced by different positive inotropic interventions **(Special Communication)**
S. Pöpping, S. Mruck, Y. Fischer, D. Kulsch, I. Ionescu, H. Kammermeier, and H. Rose H357

Muscarine-gated K^+ channel: subunit stoichiometry and structural domains essential for G protein stimulation **(Rapid Communication)**
S. J. Tucker, M. Pessia, and J. P. Adelman H379

Right ventricular contractile protein function in rats with left ventricular myocardial infarction
P. P. de Tombe, T. Wannenburg, D. Fan, and W. C. Little H73

Different responses of epicardium and endocardium to K_{ATP} channel modulators during regional ischemia
S. Miyoshi, T. Miyazaki, K. Moritani, and S. Ogawa H140

Differential effects of EMD-53998 on calcium-pressure relationship in normal and ischemic guinea pig heart
R. Ishisu, Y. Abe, K. Onishi, K. Sekioka, and T. Nakano H311

Functional effects of EMD-57033 in isovolumically beating isolated rabbit hearts
A. H. Tobias, B. K. Slinker, R. D. Kirkpatrick, and K. B. Campbell H51

Volume-related activities of sodium ion transporters: multinuclear NMR studies of isolated rat hearts
N. Askenasy and G. Navon H94

Impaired Ca^{2+} handling is an early manifestation of pressure-overload hypertrophy in rat hearts
K. C. Chang, J. H. M. Schreur, M. W. Weiner, and S. A. Camacho H228

Stability of high-energy phosphates in right ventricle: myocardial energetics during right coronary hypotension
M. Itoya, R. T. Mallet, Z.-P. Gao, A. G. Williams, Jr., and H. F. Downey H320

K_{ATP} channels in rat heart: blockade of ischemic and acetylcholine-mediated preconditioning by glibenclamide
Y.-Z. Qian, J. E. Levasseur, K.-I. Yoshida, and R. C. Kukreja H23

Regional and functional factors determining induction and maintenance of atrial fibrillation in dogs
J. Wang, L. Liu, J. Feng, and S. Nattel H148

Mitochondrial dysfunction accompanies diastolic dysfunction in diabetic rat heart
C. E. Flarsheim, I. L. Grupp, and M. A. Matlib H192

Myocardial adenosine A_1 and A_2 receptor activities during juvenile and adult stages of development
D. R. Sawmiller, R. A. Fenton, and J. G. Dobson, Jr. H235

Quantitative beat-to-beat analysis of heart rate dynamics during exercise
M. P. Tulppo, T. H. Mäkikallio, T. E. S. Takala, T. Seppänen, and H. V. Huikuri H244

Bidirectional augmentation of heart rate regulation by autonomic nervous system in rabbits
T. Kawada, Y. Ikeda, M. Sugimachi, T. Shishido, O. Kawaguchi, T. Yamazaki, J. Alexander, Jr., and K. Sunagawa H288

Proarrhythmic and antiarrhythmic actions of ion channel blockers on arrhythmias in the heart: model study **(Modeling in Physiology)**
T. R. Chay H329

VASCULAR PHYSIOLOGY

Protein kinase C inhibits delayed rectifier K^+ current in rabbit vascular smooth muscle cells
E. A. Aiello, O. Clément-Chomienne, D. P. Sontag, M. P. Walsh, and W. C. Cole H109

Formation of an F_2-isoprostane in vascular smooth muscle cells by elevated glucose and growth factors
R. Natarajan, L. Lanting, N. Gonzales, and J. Nadler H159

Effect of endothelin antagonism on blood pressure and vascular structure in renovascular hypertensive rats
J.-S. Li, L. Knafo, A. Turgeon, R. Garcia, and E. L. Schiffrin H88

Effect of subarachnoid hemorrhage on dilatation of rat basilar artery in vivo
C. G. Sobey, D. D. Heistad, and F. M. Faraci H126

Active renin and renin glycoform dynamics in the carotid artery
S. A. Katz, J. A. Opsahl, L. M. Forbis, and W. Ayenew H184

Tissue specific expression of vascular smooth muscle angiotensin II receptor subtypes during ovine pregnancy
B. E. Cox, C. R. Rosenfeld, J. E. Kalinyak, R. R. Magness, and P. W. Shaul H212

Decreased sensitivity to vasoconstrictors in aortic rings after acute exposure to nitric oxide
N. L. Kanagy, J. R. Charpie, J. Dananberg, and R. C. Webb H253

Myogenic responses of isolated rat skeletal muscle venules: modulation by norepinephrine and endothelium
G. Dörnyei, E. Monos, G. Kaley, and A. Koller H267

Vanadate causes synthesis of endothelium-derived NO via pertussis toxin-sensitive G protein in pigs
R. Nakaike, H. Shimokawa, M. K. Owada, O. Tokunaga, H. Yasutake, T. Kishimoto, C. Imada, T. Shiraishi, K. Egashira, and A. Takeshita H296

Effect of ACh and calmodulin inhibitor on O_2 transfer from exocrine pancreatic microvessels of rats
A. Seiyama, H. Kosaka, and T. Shiga H1

cGMP and cAMP in prostaglandin-induced pial artery dilation and increased CSF opioid concentration
W. M. Armstead H166

Lymph pump mechanics in the rabbit hind leg
F. Ikomi and G. W. Schmid-Schönbein H173

Encapsulation of VIP into liposomes restores vasorelaxation in hypertension in situ
H. Suzuki, Y. Noda, X.-P. Gao, F. Séjourné, H. Alkan-Önyuksel, S. Paul, and I. Rubinstein H282

Determination of Po_2 and its heterogeneity in single capillaries **(Special Communication)**
L. Zheng, A. S. Golub, and R. N. Pittman H365

Effect of hypoxia on nitric oxide production in neonatal pig lung
L. D. Nelin, C. J. Thomas, and C. A. Dawson H8

Perfusion-$M\dot{V}o_2$ mismatch during inotropic stress in CAD patients with normal contractile function
M. F. Janier, X. André-Fouet, P. Landais, M. C. Grégoire, F. Lavenne, J. Amaya, C. Mercier, J. Machecourt, and L. Cinotti H59

Nitric oxide regulates endothelium-dependent vasodilator responses in rabbit hindquarters vascular bed in vivo
G. A. Cohen, A. J. Hobbs, R. M. Fitch, M. J. Zinner, G. Chaudhuri, and L. J. Ignarro H133

Effects of oxygen on regional hemodynamics in hemorrhagic shock
H. Bitterman, V. Brod, G. Weisz, D. Kushnir, and N. Bitterman H203

Pulmonary vascular response to angiotensin II in canine pacing-induced heart failure
B. J. Roy, V. H. Pitts, and M. I. Townsley H222

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Regulation of ANG II receptor in hypertension: role of ANG II
D. H. Wang, A. Yao, H. Zhao, and D. J. DiPette H120

Sympathetic nerve activities in pulsatile and nonpulsatile systemic circulation in anesthetized goats
K. Toda, E. Tatsumi, Y. Taenaka, T. Masuzawa, and H. Takano H15

Muscle reflex stimulates sympathetic postganglionic efferents innervating triceps surae muscles of cats
J. M. Hill, C. M. Adreani, and M. P. Kaufman H38

Parasympathetic inhibition of sympathetic effects on sinus rate in anesthetized dogs
Y. Furukawa, Y. Hoyano, and S. Chiba H44

Stimulation of 5-HT_3 receptors in the NTS inhibits the cardiac Bezold-Jarisch reflex response
C. Sévoz, A. Nosjean, J.-C. Callera, B. Machado, M. Hamon, and R. Laguzzi H80

Hypoxia does not directly stimulate ischemically sensitive abdominal visceral afferents during ischemia
L.-W. Fu, H.-L. Pan, K. F. Pitsillides, and J. C. Longhurst H261

Infusions of pressor agents selectively attenuate depressor responses to ACh in anesthetized dogs
T. Nakahara, K. Ishii, Y. Tanaka, and K. Nakayama H273

Blockade of brain "ouabain" prevents sympathoexcitatory and pressor responses to high sodium in SHR
B. S. Huang and F. H. H. Leenen H103

Diurnal heart rate variability in healthy subjects: effects of aging and sex difference
Y. Yamasaki, M. Kodama, M. Matsuhisa, M. Kishimoto, H. Ozaki, A. Tani, N. Ueda, Y. Ishida, and T. Kamada H303

Hypertension, cardiac hypertrophy, and neurohumoral activity in a new animal model of obesity **(Special Communication)**
J. F. Carroll, T. M. Dwyer, A. W. Grady, G. A. Reinhart, J.-P. Montani, K. Cockrell, E. F. Meydrech, and H. L. Mizelle H373

No. 2. AUGUST 1996

CARDIAC PHYSIOLOGY

Increased carnitine palmitoyltransferase in cardiac myocytes is mediated by insulin growth factor I
E. K. Hudson, D. Wang, L. L. Bieber, L. M. Buja, and J. B. McMillin H422

Protection of reoxygenated cardiomyocytes against osmotic fragility by nitric oxide donors
K. D. Schlüter, G. Jakob, M. Ruiz-Meana, D. Garcia-Dorado, and H. M. Piper H428

Openings of cardiac K_{ATP} channel by oxygen free radicals produced by xanthine oxidase reaction
K. Tokube, T. Kiyosue, and M. Arita H478

Electrophysiological characteristics of cloned skeletal and cardiac muscle sodium channels
M. Chahine, I. Deschene, L. Q. Chen, and R. G. Kallen H498

Regulation of sodium current development in cultured atrial tumor myocytes (AT-1 cells)
T. Yang and D. M. Roden H541

Survival of metabolically inhibited ventricular myocytes is enhanced by inhibition of rigor and SR Ca^{2+} cycling
T. Koyama, D. Boston, H. Ikenouchi, and W. H. Barry H643

Phosphatidic acid increases intracellular free Ca^{2+} and cardiac contractile force
Y.-J. Xu, V. Panagia, Q. Shao, X. Wang, and N. S. Dhalla H651

Fast sodium influx provides an initial step to trigger contractions in cat ventricle
A.-M. Vites and J. A. Wasserstrom H674

β-Adrenergic modulation of Na-K pump activity in young and adult canine cardiac Purkinje fibers
F. Charpentier, M. J. Legato, S. F. Steinberg, I. S. Cohen, and M. R. Rosen H706

Blockade of lysophosphatidylcholine-modified cardiac Na channels by a lidocaine derivative QX-222
A. I. Undrovinas and J. C. Makielski H790

Dissociation of negative inotropic effect of carbachol from changes in cAMP and PKA in perfused rat hearts
J. Z. Zhang and K. M. MacLeod H404

I_{to} and action potential notch are smaller in left vs. right canine ventricular epicardium
J. M. Di Diego, Z.-Q. Sun, and C. Antzelevitch H548

Heat stress protects the perfused rabbit heart from complement-mediated injury
M. R. Gralinski, S. C. Black, L. F. Stancato, K. S. Kilgore, P. A. Campau, J. L. Park, M. J. Ozeck, W. B. Pratt, and B. R. Lucchesi H571

Cardiac electrophysiological variables in blood-perfused and buffer-perfused, isolated, working rabbit heart
A. M. Gillis, E. Kulisz, and H. J. Mathison H784

Recovery of glycolysis and oxidative metabolism during postischemic reperfusion of hypertrophied rat hearts
B. O. Schönekess, M. F. Allard, and G. D. Lopaschuk H798

Heart rate variability during artificial ventilation and apnea in brain-damaged rabbits
M. Kawamoto, K. Kaneko, Hardian, and O. Yuge H410

Parasympathetic denervation supersensitivity of the transplanted human ventricle in vivo
J. Koglin, P. Überfuhr, and W. von Scheidt H435

Response to cardiac sympathetic activation in transgenic mice overexpressing β_2-adrenergic receptor
X.-J. Du, E. Vincan, D. M. Woodcock, C. A. Milano, A. M. Dart, and E. A. Woodcock H630

Hydroxyl radical production during myocardial ischemia and reperfusion in cats
C. A. O'Neill, L.-W. Fu, B. Halliwell, and J. C. Longhurst H660

VASCULAR PHYSIOLOGY

Elemental composition of Na pump inhibited rabbit aorta VSM cells by electron probe X-ray microanalysis
H. Krep, A. LeFurgey, S. W. Graves, D. Hockett, P. Ingram, and N. K. Hollenberg H514

Effect of heparin on fibrinolytic activity and platelet function in vivo
G. R. Upchurch, C. R. Valeri, S. F. Khuri, M. J. Rohrer, G. N. Welch, H. MacGregor, G. Ragno, S. Francis, L. J. Rodino, A. D. Michelson, and J. Loscalzo H528

Angiotensin II type 1 receptor-mediated activation of Ras in cultured rat vascular smooth muscle cells
M. Okuda, Y. Kawahara, and M. Yokoyama H595

Inward rectifier K^+ currents in smooth muscle cells from rat coronary arteries: block by Mg^{2+}, Ca^{2+}, and Ba^{2+}
B. E. Robertson, A. D. Bonev, and M. T. Nelson H696

Metalloprotease-mediated cleavage secretion of pulmonary ACE by vascular endothelial and kidney epithelial cells
R. Ramchandran, S. Kasturi, J. G. Douglas, and I. Sen H744

Calcium- and phorbol ester-dependent calponin phosphorylation in homogenates of swine carotid artery
A. Rokolya, M. P. Walsh, and R. S. Moreland H776

Angiotensin II formation in dog heart is mediated by different pathways in vivo and in vitro
E. Balcells, Q. C. Meng, G. R. Hageman, R. W. Palmer, J. N. Durand, and L. J. Dell'Italia H417

Peripheral artery structure and endothelial function in heart failure: effect of ACE inhibition
P. Mulder, L. Elfertak, V. Richard, P. Compagnon, B. Devaux, J.-P. Henry, E. Scalbert, P. Desché, B. Macé, and C. Thuillez H469

Modulation of endothelium-derived nitric oxide in canine femoral veins
V. M. Miller and D. A. Barber H668

Exogenous tetrahydrobiopterin causes endothelium-dependent contractions in isolated canine basilar artery
H. Kinoshita and Z. S. Katusic H738

Hyperkalemia alters EDHF-mediated hyperpolarization and relaxation in coronary arteries
G.-W. He, C.-Q. Yang, W. F. Graier, and J.-A. Yang H760

Shear-dependent release of venular nitric oxide: effect on arteriolar tone in rat striated muscle
M. A. Boegehold H387

In vivo and in vitro vasoactive reactions of coronary arteriolar microvessels to nitroglycerin
C. J. H. Jones, L. Kuo, M. J. Davis, and W. M. Chilian H461

Relationship between vasopressin and opioids in hypoxia induced pial artery vasodilation
M. I. Rossberg and W. M. Armstead H521

Age dependence of cerebrovascular response mechanisms in domestic pigs
S. L. Zuckerman, W. M. Armstead, P. Hsu, M. Shibata, and C. W. Leffler H535

Hydrogen peroxide induces leukocyte rolling: modulation by endogenous antioxidant mechanisms including NO
B. Johnston, S. Kanwar, and P. Kubes H614

Vitamin E ameliorates adverse effects of endothelial injury in brain arterioles
W. I. Rosenblum, G. H. Nelson, R. A. Bei, R. B. Brandt, and W. Chan H637

Cellular response to reperfused oxygen in the postischemic myocardium
Y. Chung and T. Jue H687

Theoretical predictions of end-capillary P_{O_2} in muscles of athletic and nonathletic animals at $\dot{V}_{O_{2max}}$
T. K. Roy and A. S. Popel H721

Chronic α_1-adrenergic blockade stimulates terminal and arcade arteriolar development
R. J. Price and T. C. Skalak H752

Effect of length and contraction on coronary perfusion in isolated perfused papillary muscle of rat heart
C. P. Allaart and N. Westerhof H447

Vasomotor responses of newly developed coronary collateral vessels
J. W. Kinn, J. D. Altman, M. W. Chang, and R. J. Bache H490

C-reactive protein inhibits increased pulmonary vascular permeability induced by fMLP in isolated rabbit lungs
V. J. Abernathy, R. O. Webster, and T. E. Dahms H507

Altered endothelium-dependent responses in lambs with pulmonary hypertension and increased pulmonary blood flow
V. M. Reddy, J. Wong, J. R. Liddicoat, M. Johengen, R. Chang, and J. R. Fineman H562

Reduction of cytochrome-c oxidase copper precedes failing cerebral O_2 utilization in fluorocarbon-perfused cats
R. Stingele, B. Wagner, M. V. Kameneva, M. A. Williams, D. A. Wilson, N. V. Thakor, R. J. Traystman, and D. F. Hanley H579

Nitric oxide synthase inhibition by L-NAME during repetitive focal cerebral ischemia in rabbits
R. E. Anderson and F. B. Meyer H588

RSR-13, an allosteric effector of hemoglobin, increases systemic and iliac vascular resistance in rats
M. P. Kunert, J. F. Liard, and D. J. Abraham H602

Adrenomedullin activity in chronically hypoxic rat lungs
L. Zhao, L. A. Brown, A. A. Owji, D. J. R. Nunez, D. M. Smith, M. A. Ghatei, S. R. Bloom, and M. R. Wilkins H622

Enhanced microvascular relaxations to VEGF and bFGF in chronically ischemic porcine myocardium
F. W. Sellke, S. Y. Wang, A. Stamler, J. J. Lopez, J. Li, J. Li, and M. Simons H713

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Regulation of ANG II-receptor subtype and its gene expression in adrenal gland
Y. Du, D.-F. Guo, T. Inagami, R. C. Speth, and D. H. Wang H440

Nonlinear analysis of BP signal. Can it detect malfunctions in BP control?
Y. Almog, S. Eliash, O. Oz, and S. Akselrod H396

Aging is not accompanied by sympathetic hyperresponsiveness to air-jet stress
H. M. Stauss, D. A. Morgan, K. E. Anderson, M. P. Massett, and K. C. Kregel H768

Elevated heart rate variability in physically active postmenopausal women: a cardioprotective effect?
K. P. Davy, N. L. Miniclier, J. A. Taylor, E. T. Stevenson, and D. R. Seals H455

Role of ANG II in hypertension produced by chronic inhibition of nitric oxide synthase in conscious rats
M. G. Melaragno and G. D. Fink H806

Analysis of heart rate-based control of arterial blood pressure **(Modeling in Physiology)**
W. C. Rose and J. S. Schwaber H812

No. 3. SEPTEMBER 1996

CARDIAC PHYSIOLOGY

Free radicals enhance Na^+/Ca^{2+} exchange in ventricular myocytes
J. I. Goldhaber H823

Actomyosin interaction modulates resting length of unstimulated cardiac ventricular cells
S. J. Sollott, B. D. Ziman, D. M. Warshaw, H. A. Spurgeon, and E. G. Lakatta H896

Phenylephrine suppresses outward K^+ currents in rat atrial myocytes
D. R. Van Wagoner, M. Kirian, and M. Lamorgese H937

Phorbol 12-myristate 13-acetate alters SR Ca^{2+}-ATPase gene expression in cultured neonatal rat heart cells
M. Qi, J. W. M. Bassani, D. M. Bers, and A. M. Samarel H1031

Contribution of Na^+/Ca^{2+} exchange to action potential of human atrial myocytes
A. Bénardeau, S. N. Hatem, C. Rücker-Martin, B. Le Grand, L. Macé, P. Dervanian, J.-J. Mercadier, and E. Coraboeuf H1151

Age-related differences in β-adrenergic regulation of repolarization in canine epicardial myocytes
F. Charpentier, Q.-Y. Liu, M. R. Rosen, and R. B. Robinson H1174

Method for isolation of adult mouse cardiac myocytes for studies of contraction and microfluorimetry **(Special Communication)**
B. M. Wolska and R. J. Solaro H1250

Enhanced SR function in saponin-treated ventricular trabeculae from rabbits with heart failure
M. A. Denvir, N. G. MacFarlane, D. J. Miller, and S. M. Cobbe H850

Expression and localization of renin and angiotensinogen in rat heart after myocardial infarction
R. C. J. J. Passier, J. F. M. Smits, M. J. A. Verluyten, and M. J. A. P. Daemen H1040

Necrotic and apoptotic myocyte cell death in the aging heart of Fischer 344 rats
J. Kajstura, W. Cheng, R. Sarangarajan, P. Li, B. Li, J. A. Nitahara, S. Chapnick, K. Reiss, G. Olivetti, and P. Anversa H1215

Effect of preconditioning on ryanodine-sensitive Ca^{2+} release from sarcoplasmic reticulum of rat heart
M. Tani, Y. Asakura, H. Hasegawa, K. Shinmura, Y. Ebihara, and Y. Nakamura H876

Nitrite oxidation of myoglobin in perfused myocardium: implications for energy coupling in respiration
Y. Chung, D. Xu, and T. Jue H1166

Reflex vagal control of atrial repolarization
D. E. Euler, B. Olshansky, and S. Y. Kim H870

The need to account for residual strains and composite nature of heart wall in mechanical analyses
T. Kang and F. C. P. Yin H947

Perfusion-induced changes in cardiac O_2 consumption and contractility are based on different mechanisms
M. A. Dijkman, J. W. Heslinga, P. Sipkema, and N. Westerhof H984

Cardioprotection with ischemic preconditioning and MLA: role of adenosine-regulating enzymes?
K. Przyklenk, L. Zhao, R. A. Kloner, and G. T. Elliott H1004

Electrophysiological background of individual variability in electrical defibrillation efficacy
Y. Murakawa, T. Yamashita, K. Ajiki, K. Sezaki, Y. Kanese, and M. Omata H1094

Biomechanics of the deconditioned left ventricle
M. A. Fogel, K. Gupta, B. C. Baxter, P. M. Weinberg, J. Haselgrove, and E. A. Hoffman H1193

Preconditioning is not abolished by the delayed rectifier K^+ blocker dofetilide
G. J. Grover, A. J. D'Alonzo, S. Dzwonczyk, C. S. Parham, and R. B. Darbenzio H1207

Comparison of two techniques for measuring two-dimensional strain in rat left ventricles **(Special Communication)**
J. H. Omens, D. D. Farr, A. D. McCulloch, and L. K. Waldman H1256

VASCULAR PHYSIOLOGY

Regulation of endothelial NO synthase expression by cyclosporin A in bovine aortic endothelial cells
S. López-Ongil, M. Saura, D. Rodríguez-Puyol, M. Rodríguez-Puyol, and S. Lamas H1072

Preconditioning prevents chronic reperfusion-induced coronary endothelial dysfunction in rats
N. Kaeffer, V. Richard, A. François, F. Lallemand, J.-P. Henry, and C. Thuillez H842

Captopril prevents vascular and fibrotic changes but not cardiac hypertrophy in aortic-banded rats
C. P. Regan, P. G. Anderson, S. P. Bishop, and K. H. Berecek H906

Vasodilatory properties of recombinant maxadilan
T. S. Jackson, E. Lerner, R. M. Weisbrod, M. Tajima, J. Loscalzo, and J. F. Keaney, Jr. H924

Nitroglycerin relaxes rat tail artery primarily by lowering Ca^{2+} sensitivity and partially by repolarization
X.-L. Chen and C. M. Rembold H962

Interaction between sympathetic and sensory nerves in rat small arteries: involvement of nitric oxide
A. Ahluwalia and P. Vallance H969

Chronic exercise decreases adrenergic agonist-induced vasoconstriction in spontaneously hypertensive rats
H.-I. Chen and I.-P. Chiang H977

Increased activity of vascular ACE related to atherosclerotic lesions in hyperlipidemic rabbits
H. Mitani, T. Bandoh, M. Kimura, T. Totsuka, and S. Hayashi H1065

Basal and adenosine-mediated protein flux from isolated coronary arterioles
V. H. Huxley and D. A. Williams H1099

Local and conducted vasomotor responses in isolated rat cerebral arterioles
H. H. Dietrich, Y. Kajita, and R. G. Dacey, Jr. H1109

Effects of 17β-estradiol on coronary microvascular responses to endothelin-1
K. G. Lamping and D. W. Nuno H1117

Nitric oxide modulates arteriolar responses to increased sympathetic nerve activity
G. P. Nase and M. A. Boegehold H860

Early collateral and microvascular adaptations to intestinal artery occlusion in rat
J. L. Unthank, J. C. Nixon, H. M. Burkhart, S. W. Fath, and M. C. Dalsing H914

Estimated functional diameter of alveolar septal microvessels in zone 1
R. L. Conhaim and L. A. Rodenkirch H996

Acidic and basic FGFs dilate arterioles of skeletal muscle through a NO-dependent mechanism
H. M. Wu, Y. Yuan, M. McCarthy, and H. J. Granger H1087

ACh dilates pial arterioles in endothelial and neuronal NOS knockout mice by NO-dependent mechanisms
W. Meng, J. Ma, C. Ayata, H. Hara, P. L. Huang, M. C. Fishman, and M. A. Moskowitz H1145

Oxygen consumption in the avascular guinea pig retina
S. Cringle, D.-Y. Yu, V. Alder, E.-N. Su, and P. Yu H1162

Differences between cytokine effects in the microcirculation of the rat
N. Baudry, C. Rasetti, and E. Vicaut H1186

Modeling and simulation of illumination effects for evaluation of microvessels of the conjunctiva **(Modeling in Physiology)**
C. E. Wick, M. H. Loew, and J. Kurantsin-Mills H1229

Mechanisms of cerebral vasodilation by superoxide, hydrogen peroxide, and peroxynitrite **(Rapid Communication)**
E. P. Wei, H. A. Kontos, and J. S. Beckman H1262

Acute transient coronary sinus hypertension impairs left ventricular function and induces myocardial edema
J. W. Pratt, E. R. Schertel, S. L. Schaefer, K. E. Esham, D. E. McClure, C. F. Heck, and P. D. Myerowitz H834

NO synthase inhibition modulates NMDA-induced changes in cerebral blood flow and EEG activity
D. A. Pelligrino, R. L. Gay III, V. L. Baughman, and Q. Wang H990

Limitation of cardiac output by a coronary α_1-constrictor tone during exercise in dogs
S.-J. Kim, G. Kline, and P. A. Gwirtz H1125

Endothelium-derived nitric oxide mediates hypoxic vasodilation of resistance vessels in humans
M. L. Blitzer, S. D. Lee, and M. A. Creager H1182

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Influence of GABAergic mechanisms on baroreceptor inputs to nucleus tractus solitarii of rats
P. Ruggeri, C. E. Cogo, V. Picchio, C. Molinari, R. Ermirio, and F. R. Calaresu H931

Neural arc of baroreflex optimizes dynamic pressure regulation in achieving both stability and quickness
Y. Ikeda, T. Kawada, M. Sugimachi, O. Kawaguchi, T. Shishido, T. Sato, H. Miyano, W. Matsuura, J. Alexander, Jr., and K. Sunagawa H882

Cardiorespiratory and tissue oxygen dose response to rat endotoxemia
D. M. Rosser, R. P. Stidwill, D. Jacobson, and M. Singer H891

Brain angiotensin II tonically modulates sympathetic baroreflex in rabbit ventrolateral medulla
T. Saigusa, M. Iriki, and J. Arita H1015

Invariance of the resistance to venous return to carotid sinus baroreflex control
T. Hatanaka, J. T. Potts, and A. A. Shoukas H1022

Reflex vascular responses to abdominal venous distension in the anesthetized dog
C. P. A. Doe, M. J. Drinkhill, D. S. Myers, D. A. Self, and R. Hainsworth H1049

Role of parabrachial nucleus in baroreflex-mediated coronary vasoconstriction
D. D. Gutterman and A. Goodson H1079

Central V_1 AVP receptors are involved in cardiovascular adaptation to hypovolemia in WKY but not in SHR
A. S. Budzikowski, P. Paczwa, and E. Szczepańska-Sadowska H1057

Heme oxygenase substrates acutely lower blood pressure in hypertensive rats
R. A. Johnson, M. Lavesa, K. DeSeyn, M. J. Scholer, and A. Nasjletti H1132

Relation between baroreflex sensitivity and carotid artery elasticity in healthy humans
I. Bonyhay, G. Jokkel, and M. Kollai H1139

Valsalva's maneuver revisited: a quantitative method yielding insights into human autonomic control **(Special Communication)**
M. L. Smith, L. A. Beightol, J. M. Fritsch-Yelle, K. A. Ellenbogen, T. R. Porter, and D. L. Eckberg H1240

No. 4. OCTOBER 1996

CARDIAC PHYSIOLOGY

α_1-Adrenergic stimulation induces cardiac tolerance to hypoxia via induction and activation of Mn-SOD
N. Yamashita, M. Nishida, S. Hoshida, J. Igarashi, M. Hori, T. Kuzuya, and M. Tada H1356

Effects of TNF-α on $[Ca^{2+}]_i$ and contractility in isolated adult rabbit ventricular myocytes
J. I. Goldhaber, K. H. Kim, P. D. Natterson, T. Lawrence, P. Yang, and J. N. Weiss H1449

Differential regulation of voltage-activated potassium currents in cultured human atrial myocytes
S. N. Hatem, A. Bénardeau, C. Rücker-Martin, J.-L. Samuel, E. Coraboeuf, and J.-J. Mercadier H1609

A model of the action potential and underlying membrane currents in a rabbit atrial cell **(Special Communication)**
D. S. Lindblad, C. R. Murphey, J. W. Clark, and W. R. Giles H1666

Inotropic agent EMD-53998 weakens nucleotide and phosphate binding to cross bridges in porcine myocardium
Y. Zhao and M. Kawai H1394

α_1-Adrenoceptor subtypes mediating inotropic and electrophysiological effects in mammalian myocardium
M. Nagashima, Y. Hattori, Y. Akaishi, N. Tohse, I. Sakuma, A. Kitabatake, and M. Kanno H1423

Discontinuous conduction at Purkinje-ventricular muscle junction
R. T. Wiedmann, R. C. Tan, and R. W. Joyner H1507

Viscoelastic behavior of the isolated guinea pig left ventricle in diastole
V. Starc, E. L. Yellin, and S. D. Nikolic H1314

Dietary fish oil prevents reperfusion Ins(1,4,5)P_3 release in rat heart: possible antiarrhythmic mechanism
K. E. Anderson, X.-J. Du, A. J. Sinclair, E. A. Woodcock, and A. M. Dart H1483

Instantaneous diastolic transmitral pressure differences from color Doppler M mode echocardiography
N. L. Greenberg, P. M. Vandervoort, and J. D. Thomas H1267

Coronary hyperperfusion augments myocardial oxygen consumption
Y. Ishibashi, J. Zhang, D. J. Duncker, C. Klassen, T. Pavek, and R. J. Bache H1384

Recurrent appearance of protective zones after an unsuccessful defibrillation shock
C. Hwang, W. Fan, and P.-S. Chen H1491

Regulation of sympathetic presynaptic components in rat left ventricle during ligation of abdominal aorta
C. Nyquist-Battie, P. K. Cochran, V. R. Evans, J. M. Hitchcock, and C. Unal H1547

Increased ventricular contractility is not sufficient for effective positive inotropic intervention
P. F. Binkley, D. B. Van Fossen, G. J. Haas, and C. V. Leier H1635

VASCULAR PHYSIOLOGY

Expression of phagocyte NADPH oxidase components in human endothelial cells
S. A. Jones, V. B. O'Donnell, J. D. Wood, J. P. Broughton, E. J. Hughes, and O. T. G. Jones H1626

Communication between tyrosine kinase pathway and myosin light chain kinase pathway in smooth muscle
N. Jin, R. A. Siddiqui, D. English, and R. A. Rhoades H1348

Adenosine A_2-receptor activation inhibits neutrophil-mediated injury to coronary endothelium
Z.-Q. Zhao, H. Sato, M. W. Williams, A. Z. Fernandez, and J. Vinten-Johansen H1456

Elevated pressure stimulates protooncogene expression in isolated mesenteric arteries
S. P. Allen, H. M. Liang, M. A. Hill, and R. L. Prewitt H1517

Lysophosphatidylcholine stimulates phospholipase D in human coronary endothelial cells: role of PKC **(Rapid Communication)**
D. A. Cox and M. L. Cohen H1706

Change in intramural strain distribution in rat aorta due to smooth muscle contraction and relaxation **(Rapid Communication)**
T. Matsumoto, M. Tsuchida, and M. Sato H1711

Temporal and spatial relationship between no-reflow phenomenon and postischemic necrosis in skeletal muscle
M. J. Hickey, J. V. Hurley, and W. A. Morrison H1277

Extreme vasoreactivity of rat epineurial arterioles to vasopressin
H. Sasaki and P. A. Low H1307

Arginine analogues inhibit responses mediated by ATP-sensitive K^+ channels
H. A. Kontos and E. P. Wei H1498

Inhibition of brain *P*-450 arachidonic acid epoxygenase decreases baseline cerebral blood flow
N. J. Alkayed, E. K. Birks, A. G. Hudetz, R. J. Roman, L. Henderson, and D. R. Harder H1541

Repeated cocaine administration reduces bradykinin-induced dilation of pial arterioles
J. R. Copeland, K. A. Willoughby, R. J. Police, and E. F. Ellis H1576

Oxygen modulates α_{1B}-adrenergic receptor gene expression by arterial but not venous vascular smooth muscle
A. D. Eckhart, Z. Zhu, W. J. Arendshorst, and J. E. Faber H1599

Tissue oxygenation and perfusion in endotoxemia
M. Sair, P. J. Etherington, N. P. Curzen, C. P. Winlove, and T. W. Evans H1620

Modeling regional myocardial flows from residue functions of an intravascular indicator **(Modeling in Physiology)**
K. Kroll, N. Wilke, M. Jerosch-Herold, Y. Wang, Y. Zhang, R. J. Bache, and J. B. Bassingthwaighte H1643

Protein kinase C modulates microvascular permeability through nitric oxide synthase **(Rapid Communication)**
M. M. Ramírez, D. D. Kim, and W. N. Durán H1702

L-NNA-sensitive regional cerebral blood flow augmentation during hypercapnia in type III NOS mutant mice **(Rapid Communication)**
J. Ma, W. Meng, C. Ayata, P. L. Huang, M. C. Fishman, and M. A. Moskowitz H1717

Direct detection and quantification of singlet oxygen during ischemia and reperfusion in rat hearts **(Letter to the Editor)**
M. Ashraf and X. Zhai H1720

Matching dicrotic notch and mean pulmonary artery pressures: implications for effective arterial elastance
D. Chemla, J.-L. Hébert, C. Coirault, S. Salmeron, K. Zamani, and Y. Lecarpentier H1287

L-Arginine augments nitric oxide production and mesenteric blood flow in ovine endotoxemia
K. G. Allman, A. P. Stoddart, M. M. Kennedy, and J. D. Young H1296

Effect of α_1-adrenoceptor blockade on resting and hyperemic myocardial blood flow in normal humans
R. Lorenzoni, S. D. Rosen, and P. G. Camici H1302

Acute stress increases venomotor tone in conscious rats
D. S. Martin, C. Appelt, M. C. Rodrigo, and M. C. Egland H1375

Effects of cardiac contraction and coronary sinus pressure elevation on collateral circulation
M. Sato, T. Saito, M. Mitsugi, S.-I. Saitoh, T. Niitsuma, K. Maehara, and Y. Maruyama H1433

Neurally mediated cardiac effects of forskolin in conscious dogs
M. Iwase, Y. Ishikawa, Y.-T. Shen, R. P. Shannon, N. Sato, P. K. Ganguly, T. Eki, D. E. Vatner, and S. F. Vatner H1473

Direct in vivo effects of nitric oxide on the coronary circulation
J. W. Chambers, G. S. Voss, J. R. Snider, S. M. Meyer, J. L. Cartland, and R. F. Wilson H1584

Activation of ATP-sensitive potassium channels contributes to reactive hyperemia in humans
P. F. Banitt, P. Smits, S. B. Williams, P. Ganz, and M. A. Creager H1594

Measurement of regional myocardial blood flow in rats by unlabeled microspheres and Coulter Channelyzer **(Special Communication)**
X. Wang, F. Li, S. Said, J. M. Capasso, and A. M. Gerdes H1656

Vasodilation and muscle pump contribution to immediate exercise hyperemia **(Rapid Communication)**
M. E. Tschakovsky, J. K. Shoemaker, and R. L. Hughson H1697

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Isolation, mapping, and regulated expression of the gene encoding mouse C-type natriuretic peptide
H. Huang, C. G. Acuff, and M. E. Steinhelper H1565

Serum interspecies differences in metabolic pathways of bradykinin and [des-Arg^9]BK: influence of enalaprilat

Calcium homeostasis in cardiomyocytes isolated from heat-shocked rats
R. N. Cornelussen, L. Ver Donck, G. Verellen, M. Borgers, G. J. van der Vusse, R. S. Reneman, and L. H. E. H. Snoeckx H1938

Role of microtubules in myocyte contractile dysfunction during cardiac hypertrophy in the rat
Y. Ishibashi, H. Tsutsui, S. Yamamoto, M. Takahashi, K. Imanaka-Yoshida, T. Yoshida, Y. Urabe, M. Sugimachi, and A. Takeshita H1978

Visualization of doxorubicin-induced oxidative stress in isolated cardiac myocytes
N. Sarvazyan H2079

Inactivation of the calcium current is involved in overdrive suppression of rabbit sinoatrial node cells
E.-I. Watanabe, H. Honjo, M. R. Boyett, I. Kodama, and J. Toyama H2097

Intracellular protons inhibit transient outward K^+ current in ventricular myocytes from diabetic rats
Z. Xu, K. P. Patel, and G. J. Rozanski H2154

Model clamp and its application to synchronization of rabbit sinoatrial node cells **(Modeling in Physiology)**
R. Wilders, E. E. Verheijck, R. Kumar, W. N. Goolsby, A. C. G. Van Ginneken, R. W. Joyner, and H. J. Jongsma H2168

Cardiomyocyte DNA synthesis and binucleation during murine development **(Rapid Communication)**
M. H. Soonpaa, K. K. Kim, L. Pajak, M. Franklin, and L. J. Field H2183

Metabolic basis of decreased transient outward K^+ current in ventricular myocytes from diabetic rats **(Rapid Communication)**
Z. Xu, K. P. Patel, and G. J. Rozanski H2190

Regulation of α_1-, β_1-, and β_2-adrenergic receptors in rat heart by norepinephrine
M. Zhao, H. K. Hagler, and K. H. Muntz H1762

Ca^{2+} sensitizer Org-30029 reverses acidosis- and BDM-induced contractile depression in canine myocardium
A. Watanabe, H. Tomoike, and M. Endoh H1829

Action potentials in right and left ventricles from chronic hypoxic rats: effect of almitrine
P. Kreher, C. Keriel, and X. Leverve H1856

Contribution of cytosolic and membrane-bound 5′-nucleotidases to cardiac adenosine production
A. Darvish, R. W. Pomerantz, P. G. Zografides, and P. J. Metting H2162

Ischemic preconditioning in human and rat ventricle
J. C. Cleveland, Jr., M. M. Wollmering, D. R. Meldrum, R. T. Rowland, T. F. Rehring, B. C. Sheridan, A. H. Harken, and A. Banerjee H1786

Effect of nutritional state on substrate metabolism and contractile function in postischemic rat myocardium
C. Montessuit, I. Papageorgiou, I. Tardy, and R. Lerch H2060

Antecedent ischemia reverses effects of adenosine on glycolysis and mechanical function of working hearts
B. A. Finegan, M. Gandhi, G. D. Lopaschuk, and A. S. Clanachan H2116

Attenuation of postischemic reperfusion injury is related to prevention of $[Ca^{2+}]_m$ overload in rat hearts
M. Miyamae, S. A. Camacho, M. W. Weiner, and V. M. Figueredo H2145

GH replacement fails to improve ventricular function in hypophysectomized rats with myocardial infarction
Y.-T. Shen, R. T. Wiedmann, J. J. Lynch, W. Grossman, and R. G. Johnson H1721

Compressibility of perfused passive myocardium
F. C. P. Yin, C. C. H. Chan, and R. M. Judd H1864

One-day cold perfusion of bimakalim and butanedione monoxime restores ex situ cardiac function
D. F. Stowe, B. M. Graf, S. Fujita, and G. J. Gross H1884

Temporal evaluation of left ventricular remodeling and function in rats with chronic volume overload
G. L. Brower, J. R. Henegar, and J. S. Janicki H2071

Habitual exercise attenuates myocardial stiffness in diabetes mellitus in rats
A. J. Woodiwiss, W. J. Kalk, and G. R. Norton H2126

VASCULAR PHYSIOLOGY

Neuropeptide Y reduces macromolecule permeability of coronary endothelial monolayers
T. Noll, A. Hempel, and H. M. Piper H1878

Modulation of mitochondrion-mediated oxidative stress by nitric oxide in human placental trophoblastic cells
N. Goda, M. Suematsu, M. Mukai, K. Kiyokawa, M. Natori, S. Nozawa, and Y. Ishimura H1893

Roles of calcium and kinases in regulation of thrombin-stimulated preproendothelin-1 transcription
T. A. Marsen, M. S. Simonson, and M. J. Dunn H1918

Arginase activity in endothelial cells: inhibition by N^G-hydroxy-L-arginine during high-output NO production
G. M. Buga, R. Singh, S. Pervin, N. E. Rogers, D. A. Schmitz, C. P. Jenkinson, S. D. Cederbaum, and L. J. Ignarro H1988

Hypoxia induces PECAM-1 phosphorylation and transendothelial migration of monocytes
V. K. Kalra, Y. Shen, C. Sultana, and V. Rattan H2025

Activation of human platelets by protein kinase C antibody: role for surface phosphorylation in homeostasis
A. Babinska, Y. H. Ehrlich, and E. Kornecki H2134

Nitric oxide inhibits pulmonary artery catalase and H_2O_2-associated relaxation
K. M. Mohazzab-H., R. P. Fayngersh, and M. S. Wolin H1900

Mechanism of relaxations to C-type natriuretic peptide in veins
M. Banks, C.-M. Wei, C. H. Kim, J. C. Burnett, Jr., and V. M. Miller H1907

Effects of anion exchange on intracellular pH and tension in basilar artery of dogs
J. Yu, B. Y. Ong, J. Zheng, E. J. Cragoe, D. Bose, and R. Bose H1912

Endothelin receptors are modulated in association with endogenous fluctuations in estrogen
D. A. Barber, G. C. Sieck, L. A. Fitzpatrick, and V. M. Miller H1999

Exogenous NO inhibits basal NO release from vascular endothelium in vitro and in vivo
X.-L. Ma, B. L. Lopez, T. A. Christopher, D. S. Birenbaum, and J. Vinten-Johansen H2045

Short- and long-term effects of neonatal hypo- and hyperthyroidism on coronary arterioles in rat
M. I. Heron and K. Rakusan H1746

Neutrophil enhancement of reperfusion-induced capillary fluid filtration associated with hypercholesterolemia
N. R. Harris and D. N. Granger H1755

Role of mast cells in oxidized low-density lipoprotein-induced microvascular dysfunction
L. Liao and D. N. Granger H1795

Protease inhibition attenuates microvascular dysfunction in postischemic skeletal muscle
D. L. Carden and R. J. Korthuis H1947

Control of arteriovenous anastomoses in rabbit ear model of digital perfusion
D. C. Pollock, Z. Li, L. A. Koman, E. S. Gordon, and T. L. Smith H2007

Computational simulations of local vascular heparin deposition and distribution
M. A. Lovich and E. R. Edelman H2014

NOS activity in brain and endothelium: relation to hypercapnic rise of cerebral blood flow in rats
M. Fabricius, I. Rubin, M. Bundgaard, and M. Lauritzen H2035

Ischemic preconditioning attenuates postischemic leukocyte adhesion and emigration
T. Akimitsu, D. C. Gute, and R. J. Korthuis H2052

A sialyl Lewis^x-containing carbohydrate reduces infarct size: role of selectins in myocardial reperfusion injury
D. M. Flynn, A. J. Buda, P. R. Jeffords, and D. J. Lefer H2086

Mechanisms of protection afforded by preconditioning to endothelial function against ischemic injury
J.-F. Bouchard and D. Lamontagne H1801

Method for determining distribution of reflection sites in the arterial system
F. Pythoud, N. Stergiopulos, N. Westerhof, and J.-J. Meister H1807

Effects of hemodilution on gastric regional perfusion and intramucosal pH
M. Kleen, O. Habler, J. Hutter, A. Podtschaske, M. Tiede, G. Kemming, M. Welte, C. Corso, and K. Messmer H1849

β_2-Adrenergic dilation of conductance coronary arteries involves flow-dependent NO formation in conscious dogs
N. Hamdad, Z. Ming, R. Parent, and M. Lavallée H1926

A time-dependent balance between endothelins and nitric oxide regulating portal resistance after endotoxin
B. H. J. Pannen, M. Bauer, J. X. Zhang, J. L. Robotham, and M. G. Clemens H1953

Role of nitric oxide in lung ischemia and reperfusion injury
T. M. Moore, P. L. Khimenko, P. S. Wilson, and A. E. Taylor H1970

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Skeletal muscle β-adrenoreceptors and phosphate metabolism abnormalities in heart failure in rats
Z. Chati, C. Michel, J. M. Escanye, P. M. Mertes, C. Ribuot, D. Canet, and F. Zannad H1739

Participation of galanin in baroreflex inhibition of heart rate by hypothalamic PVN in rat
Y.-L. Chen, S. H. H. Chan, and J. Y. H. Chan H1823

Daily exercise and gender influence arterial baroreflex regulation of heart rate and nerve activity
C.-Y. Chen and S. E. DiCarlo H1840

Blocking L-selectin function attenuates reperfusion injury following hemorrhagic shock in rabbits
C. Ramamoorthy, S. R. Sharar, J. M. Harlan, T. F. Tedder, and R. K. Winn H1871

Transfer function analysis of ventilatory influence on systemic arterial pressure in the rat
T. B. J. Kuo, C. C. H. Yang, and S. H. H. Chan H2108

Cardiac output mediates the antihypertensive effect of vasopressin in spontaneous hypertension

Oxidized low-density lipoproteins and microvascular responses to ischemia-reperfusion
L. Liao, N. R. Harris, and D. N. Granger H2508

Permeability-related changes revealed at endothelial cell borders in inflamed venules by lectin binding
G. Thurston, P. Baluk, A. Hirata, and D. M. McDonald H2547

Effects of leukocyte capillary plugging in skeletal muscle ischemia-reperfusion injury
A. G. Harris and T. C. Skalak H2653

Velocity differences between L- and P-selectin-dependent neutrophil rolling in venules of mouse cremaster muscle in vivo
U. Jung, D. C. Bullard, T. F. Tedder, and K. Ley H2740

Pulmonary vascular pressure effects by endothelin-1 in normoxia and chronic hypoxia: a longitudinal study
S. Tjen-A-Looi, R. Ekman, J. Osborn, and I. Keith H2246

Ventilation-induced pulmonary vasodilation at birth is modulated by potassium channel activity
M. Tristani-Firouzi, E. B. Martin, S. Tolarova, E. K. Weir, S. L. Archer, and D. N. Cornfield H2353

Derivation of the ascending aortic-carotid pressure transfer function with an arterial model
M. Karamanoglu and M. P. Feneley H2399

Combined inhibition of P-selectin and ICAM-1 reduces myocardial injury following ischemia and reperfusion
D. J. Lefer, D. M. Flynn, D. C. Anderson, and A. J. Buda H2421

HSP induction inhibits iNOS mRNA expression and attenuates hypotension in endotoxin-challenged rats
G. J. Hauser, E. K. Dayao, K. Wasserloos, B. R. Pitt, and H. R. Wong H2529

Validation of transit-time ultrasound flow probes to directly measure portal blood flow in conscious rats **(Special Communication)**
M. S. D'Almeida, S. Cailmail, and D. Lebrec H2701

ATP: the red blood cell link to NO and local control of the pulmonary circulation **(Rapid Communication)**
R. S. Sprague, M. L. Ellsworth, A. H. Stephenson, and A. J. Lonigro H2717

Blood flow response to treadmill running in the rat spinotrapezius muscle **(Rapid Communication)**
T. I. Musch and D. C. Poole H2730

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Firing properties of identified parasympathetic cardiac neurons in nucleus ambiguus
D. Mendelowitz H2609

Baroreflex frequency-response characteristics to aortic depressor and carotid sinus nerve stimulation in rats
W. Fan, P. J. Reynolds, and M. C. Andresen H2218

Renal hemodynamics in rats with myocardial infarction: selective antagonism of angiotensin receptor subtypes
P. F. Mento, M. E. Maita, and B. M. Wilkes H2306

Frequency and amplitude of sympathetic discharges by baroreflexes during hypoxia in conscious rabbits
S. C. Malpas, R. D. Bendle, G. A. Head, and J. H. Ricketts H2563

ANG II chronically supports renal and lumbar sympathetic activity in sodium-deprived, conscious rats
L. Xu and V. L. Brooks H2591
